

IT INFRASTRUCTURE

ManageEngine Endpoint Central

Organise patching, software deployment and inventory for employee devices.

UNDERSTAND THE PRODUCT

ManageEngine Endpoint Central provides endpoint administration, including patching, software deployment and inventory. It manages devices; it is not a replacement for endpoint threat protection or data loss prevention. [1]

1

Patching

Organise how updates reach your devices. Document your current patch process first. [1]

2

Software deployment

Deploy software to devices from a central place. [1]

3

Inventory

Keep track of the devices and software in your estate. [1]

PLATFORM AND PURCHASE CONSIDERATIONS

Match the edition and licensing metric to the number of managed devices. Check cloud versus on-premises availability for the integrations you need.

HOW IT WORKS - SIMPLIFIED

Devices are enrolled with the product; administrators then manage patches, software and inventory from a central console. Features depend on edition and configuration. [1]

Capabilities depend on configuration and licensing. Official sources on page 2.

YOUR ITSIPL PURCHASE DISCUSSION

From product to solution.

Define the right product, budget and delivery responsibilities with ITSIPL.

01 Requirements and scoping

Discuss your device inventory, operating systems, patch process and locations with ITSIPL.

02 Licensing and quotation

Request the edition, managed-device count, add-ons and support as explicit line items.

03 Deployment planning

Ask about pilot devices, agent rollout, patch policy design and handover.

04 Support and renewals

Agree who administers the console, support escalation and renewal dates.

BUDGET DRIVERS

Managed endpoints, edition, add-ons and hosting for on-premises deployment, plus setup and support. Request an itemised quote separating licences, one-time work and recurring services.

VALIDATE BEFORE ROLLOUT

Check agent coverage, patch success, software deployment results and the effect on device performance with a pilot group.

CLEAR RESPONSIBILITIES, NO SURPRISES

Use your ITSIPL proposal to document licences, services, delivery owner (ITSIPL, vendor or another provider), acceptance criteria and support terms. The discussion areas above are not a promise that every service is included. Confirm your final scope before ordering.

Let's discuss your requirements.
