

DATA LOSS PREVENTION

ManageEngine Endpoint DLP Plus

Find sensitive files and control how data moves on employee computers.

UNDERSTAND THE PRODUCT

ManageEngine Endpoint DLP Plus provides sensitive-file discovery, classification and controls on endpoint data movement. It addresses data on devices, which is different from patching or threat detection. [1]

1

Discovery

Find where sensitive files are stored on endpoints. [1]

2

Classification

Classify data so controls can be applied to what matters. [1]

3

Data-movement controls

Apply controls to how data moves from endpoints. Confirm exact channels and platforms in the proposal. [1]

PLATFORM AND PURCHASE CONSIDERATIONS

Endpoint administration, DLP and threat detection solve different problems. Do not substitute one for another because they share a vendor name. Check cloud or on-premises availability and the licensing metric for this product.

HOW IT WORKS - SIMPLIFIED

The product discovers and classifies sensitive files on endpoints and applies controls where data moves. Your team defines policy and reviews events. Capabilities depend on edition and configuration. [1]

Capabilities depend on configuration and licensing. Official sources on page 2.

YOUR ITSIPL PURCHASE DISCUSSION

From product to solution.

Define the right product, budget and delivery responsibilities with ITSIPL.

01 Requirements and scoping

Discuss your device inventory, the data transfers you want to control and who will review events.

02 Licensing and quotation

Request endpoints covered, the edition, add-ons and support as explicit line items.

03 Pilot planning

Ask about a pilot group, policy design, user communication and rollback.

04 Operations and renewals

Agree policy ownership, event review and renewal dates.

BUDGET DRIVERS

Number of endpoints, edition, add-ons, deployment type and hosting needs, policy design and support. Request an itemised quote separating licences, one-time work and recurring services.

VALIDATE BEFORE ROLLOUT

Check discovery coverage, false positives, endpoint performance and the user impact of each control before broad rollout.

CLEAR RESPONSIBILITIES, NO SURPRISES

Use your ITSIPL proposal to document licences, services, delivery owner (ITSIPL, vendor or another provider), acceptance criteria and support terms. The discussion areas above are not a promise that every service is included. Confirm your final scope before ordering.

Let's discuss your requirements.
