

IT INFRASTRUCTURE

ManageEngine OpManager

Monitor the availability and performance of your network and servers.

UNDERSTAND THE PRODUCT

ManageEngine OpManager provides network and server availability and performance monitoring. Decide what needs watching and who will act on alerts before choosing an edition. [1]

1

Availability

Monitor whether network devices and servers are up and reachable. [1]

2

Performance

Track performance so slow-downs can be spotted and investigated. [1]

3

Monitoring scope

List the devices, servers and links to cover, and agree who responds to alerts.

PLATFORM AND PURCHASE CONSIDERATIONS

Check editions, add-ons, the licensing metric and the hosting requirements for on-premises deployment. Confirm integrations and alert-handling ownership.

HOW IT WORKS - SIMPLIFIED

OpManager collects availability and performance data from monitored devices and servers, and presents it to your team for review and alerting. Capabilities depend on edition and configuration. [1]

Capabilities depend on configuration and licensing. Official sources on page 2.

YOUR ITSIPL PURCHASE DISCUSSION

From product to solution.

Define the right product, budget and delivery responsibilities with ITSIPL.

01 Requirements and scoping

Discuss your monitoring estate: devices, servers, links, locations and who responds to alerts.

02 Licensing and quotation

Request the edition, number of monitored devices, add-ons and support as explicit line items.

03 Deployment planning

Ask about hosting, discovery of devices, alert thresholds and handover.

04 Support and renewals

Agree support contact, escalation route and renewal dates.

BUDGET DRIVERS

Monitored devices, edition, add-ons and hosting requirements for on-premises deployment, plus setup effort and support. Request an itemised quote separating licences, one-time work and recurring services.

VALIDATE BEFORE ROLLOUT

Check device discovery, alert quality, dashboard usefulness and how quickly your team can respond to a test alert.

CLEAR RESPONSIBILITIES, NO SURPRISES

Use your ITSIPL proposal to document licences, services, delivery owner (ITSIPL, vendor or another provider), acceptance criteria and support terms. The discussion areas above are not a promise that every service is included. Confirm your final scope before ordering.

Let's discuss your requirements.
