

MANAGED SERVICES

ManageEngine ServiceDesk Plus

Organise IT service requests with ticketing and, by edition, asset and change management.

UNDERSTAND THE PRODUCT

ManageEngine ServiceDesk Plus provides service management with ticketing and edition-dependent asset and change-management capabilities. Match the edition to the processes you actually run. [1]

1

Ticketing

Track service requests in one place instead of scattered email and chat. [1]

2

Edition-dependent features

Asset and change-management capabilities depend on the edition. Confirm each one you need. [1]

3

Licensing metric

Technician count is a different metric from managed-device count. Confirm which applies.

PLATFORM AND PURCHASE CONSIDERATIONS

Check cloud versus on-premises availability, integrations and the workflow you want to run. Describe your current service-desk process before choosing an edition.

HOW IT WORKS - SIMPLIFIED

Requests are logged as tickets, routed to technicians and tracked to resolution. Asset and change features depend on edition. [1]

Capabilities depend on configuration and licensing. Official sources on page 2.

YOUR ITSIPL PURCHASE DISCUSSION

From product to solution.

Define the right product, budget and delivery responsibilities with ITSIPL.

01 Requirements and scoping

Discuss your service-desk workflow, number of technicians, request types and any asset or change needs.

02 Licensing and quotation

Request the edition, technician or other metric, add-ons and support as explicit line items.

03 Deployment planning

Ask about hosting, workflow setup, request forms, migration of existing tickets and handover.

04 Support and renewals

Agree who administers the tool, support escalation and renewal dates.

BUDGET DRIVERS

Technicians or other licensing metric, edition, add-ons and hosting for on-premises deployment, plus setup and support. Request an itemised quote separating licences, one-time work and recurring services.

VALIDATE BEFORE ROLLOUT

Walk a real request through logging, routing and closure, and check that reports show what your team needs.

CLEAR RESPONSIBILITIES, NO SURPRISES

Use your ITSIPL proposal to document licences, services, delivery owner (ITSIPL, vendor or another provider), acceptance criteria and support terms. The discussion areas above are not a promise that every service is included. Confirm your final scope before ordering.

Let's discuss your requirements.
